

Answer Sheet

Enter a check for each answer in the column for **a** or **b**

[illegible]

Directions for Scoring

1. Add down so that the total number of "a" answers is written in the box at the bottom of each column. Do the same for the "b" answers you have checked. Each of the 14 boxes should have a number in it.
2. Transfer the number in box No. 1 of the answer sheet to box No. 1 below the answer sheet. Do this for box No. 2 as well. Note, however, that you have two numbers for boxes 3 through 8. Bring down the first number for each box beneath the second, as indicated by the arrows. Now add all the pairs of numbers and enter the total in the boxes below the answer sheet, so each box has only one number.
3. The highest letter in each of the 4 pairs is your Type: for example, ESTP or INFJ or any one of the 16 types. If your numbers are equal in a particular pair, then you should put an X, for example XNFJ. Then you should read the descriptions for INFJ and ENFJ and see which one fits you better.
